SKILLS

Software Architecture

- Ability to analyze complex scenarios and propose efficient solutions, focusing on scalability, simplicity and alignment with project objectives.
- Design Patterns: **MVC**, **SOLID**, **DDD** (Domain-Driven Design), Atomic Design, etc.
- Process Mapping, Flowcharts (BPMN).
- Experience in modeling and creating new systems.

Frontend:

- Development of interfaces with different frameworks and scenarios.
- Ability to create any type of screen and interface, ensuring an intuitive and responsive user experience.
- Tecnologias: HTML, CSS, JavaScript (ECMAScript, TypeScript).
- Frameworks: **Vue.js** (2 and 3), **React** (JSX/TSX), **Nuxt**, **Next.js** (SSR).
- Tools: **Node.js**, SCSS (SASS), Webpack, Vite, **TypeScript**.
- Design System, UX/UI.
- Testes: Jest, Vitest, Testing Library, **Playwright** e Cypress (e2e).
- **Websockets** and real-time collaboration: **Socket.IO**, **YJS**.
- Web Components (basic).
- GSAP animations (basic/intermediate)

Mobile:

- Development in React Native (medium knowledge) and Flutter (basic knowledge).
- Knowledge of Ionic Vue and Capacitor tools.
- PWA (Progressive Web Apps, basic knowledge).

Backend:

- Frameworks: **Phoenix** (Elixir), Rails (Ruby), **NestJS/Express** (Node.js), **Django** (Python).
- Databases: SQL, PostgreSQL and MySQL MongoDB (initial).
- Messaging: Celery, Kafka (basic).

Infrastructure

- Implantation in AWS: ECS, EC2, S3, ALB.
- Docker (use and dockerization of applications), Docker Compose, Kubernetes.

Other Knowledge:

- Version Control: Git, SemVer.

- Development Practices: **TDD**, **Clean Code**.
- CI/CD: GitHub Actions.
- Design: Figma.

EXPERIENCE

SHEEPEEZY, Sydney - Australia — Developer *Full Stack*

SINCE JULY 2024 TO NOW, HOME OFFICE

Working as a Fullstack Developer, using technologies such as React, React Native, Nestjs, Redis, and Typescript, an architecture based on microservices. Use of Docker and Kubernetes.
